honourable mention

# LED Technology for your swimming pool

Energy efficiency of the LED lamps used in LumiPlus Design

## GAMA PRODUCTOS

Lumiplus Design

### ▶ INNOX EFFECT

Finished with a stainless steel look thanks to state-of-the-art IMD material (In Mold Decoration). Available in 2 versions: white light and RGB/RGB DMX

LumiPlus Design innox effect is the first underwater spotlight made with In Mold Decoration technology

**RGB / RGB DMX**  
Luminous flux  
2544 lm  
40W (57VA)

**LUZ BLANCA**  
Luminous flux  
4320 lm  
45W (50VA)

### ▶ PURE WHITE

White finish. Available in 2 versions: white light and RGB/RGB DMX

**RGB / RGB DMX**  
Luminous flux  
2544 lm  
40W (57VA)

**LUZ BLANCA**  
Luminous flux  
4320 lm  
45W (50VA)

## PRESTACIONES

Lumiplus Design

- Up to 87% energy saving
- 100,000 hours of useful life
- 3-year guarantee
- New finishes with IMD technology that increase resistance

Aesthetics and design

Greater integration

Longer life

Adaptable

More efficient

IMD technology

RGB

No maintenance

LumiPlus Design substantially improves the light in your swimming pool and reduces your energy consumption drastically. With LumiPlus Design, energy efficiency is improved in comparison with a traditional PAR 56 halogen lamp of 300W. Its useful life is 100 times greater and its energy consumption is 6 times lower. LumiPlus Design guarantees a lifespan of 100,000 hours, maintaining 70% of initial luminous flux at 50,000 hours of operation."

The improved lighting and optical performance optimises installations thanks to the new position of the LEDs, guaranteeing maximum lighting in the swimming pool and preventing external light loss. It should be installed in niches from the new LumiPlus Design range.

LumiPlus Design is compatible with all LumiPlus, Eco, Top, DMX control systems and the LumiPlus LED App.
